**TECHNICAL INFORMATION:**

**ACCUKIDE EZ—RELEASE DRAWER RELEASE SYSTEM**

The 9308 EZ-Release is a drawer-release system that lets users open locking drawers or compartments quickly and single-handedly. For use with pairs of 9307E, 9308E, 9327E, and 9328E, or in combination with 9301E or 9308-E5.

### KEY INFORMATION

**Finishes:** Anodized aluminum and polymer  
**End Cap Height:** 3.0” [76.2 mm]  
**End Cap Width:** 1.5” [38.10 mm]  
**Bar lengths to accommodate drawer widths up to:** 16”, 18”, 24”, 30”, 36”, 48”, and 60” [406 – 1525 mm]  
**Hardware:** (6X) #10-32 x ½” pan head screws and (6X) lock washers (included*).  
**Optional:** Right hand key-lock

### EZ-RELEASE INSTALLATION INSTRUCTIONS

Once the Accuride slides and drawer are installed (slides not included), follow the instructions below to install the EZ-Release Kit.

Before you get started, review the part list shown in below.

### DRAWER INSTALLATION

First, drill 0.20 diameter (Ø 13/64") mounting holes on the drawer front, as shown on Figure 1.

#### Figure 1

![Figure 1](image)

#### BAR LENGTH

Cut the bar to length. The cut length is 3” shorter than the outside drawer width.

See Figure 2. For example: For a 16” drawer you will order EZREL-16 Kit (non-locking part number), no cut required. However, if you have a 12” drawer, you would order EZREL-16 Kit but then cut the bar 3” less than the measured drawer width. Same process applies to other non-standard drawer widths.

*Figure 5*

**BAR & END CAP MATERIALS**

Bar: Aluminum
Mounting Brackets: Aluminum
End Caps: Polymer
RoHs compliant

The hardware provided is for up to ¼” drawer thickness, longer mounting screws (not included) are required for thicker drawers. Screws should not be more than 3/8” longer than the drawer thickness. All screws should be installed before tightening.
