

MARKET PROFILE:

ELECTRIC VEHICLE CHARGING SOLUTIONS

EMBRACING CHANGE IN THE EV CHARGING MARKET

ACCESS COMPONENT EXPERTISE FOR ALL YOUR CHARGING NEEDS

Allegis has established a reputation as an authority on access hardware components by supplying an extensive range of products and constantly focusing on improvement.

We stay on top of technological shifts and industry trends

and are ready to support the growth of the electric vehicle market. Whether you need handles, latches, hinges, gas springs, or a custom part to complete your design, you can count on our selection of parts and knowledge to back it up.

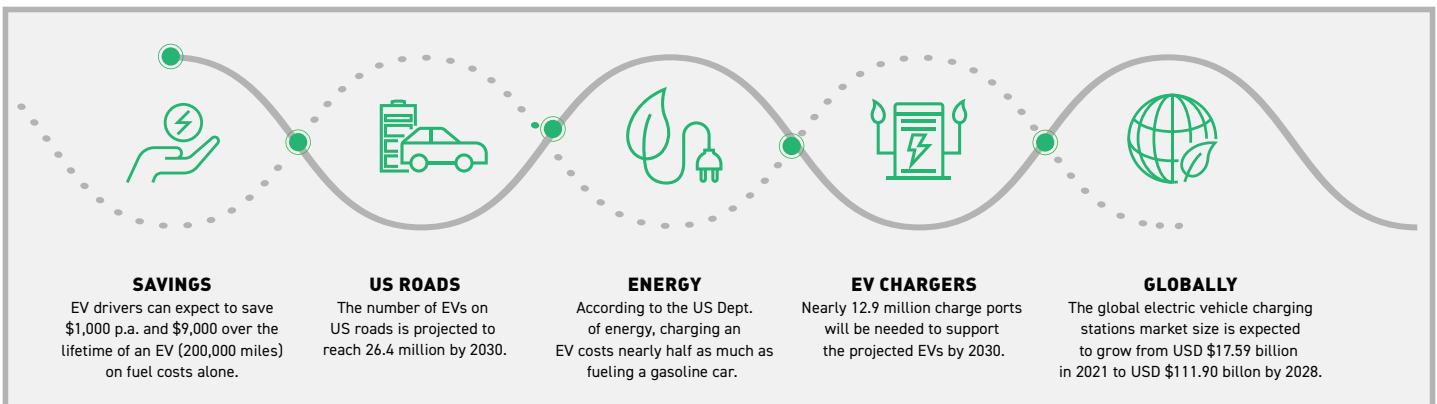

ACCESSING YOUR SOLUTION FOR ELECTRIC VEHICLE CHARGING STATIONS

At Allegis, we bring a holistic approach to access hardware engineering. We work closely with our customers to see the entire picture – understanding that security and protection from the elements are key. If it opens and closes, we can make it better to protect the contents on the inside and maintain the structure on the outside.

We have developed trusted relationships with leading manufacturers to make well-designed products that deliver more productivity and value. Components can be selected based on several key features.:

- **Weather / Sealing concerns:** From the correct sealing profile or gasket to the correct latch we have the products to keep the elements from damaging your equipment
- **Security:** Needs to meet ISO 15118:20 Standards
- **Access:** Whether it be mechanically keyed or electronically activated, Allegis has a solution
- **Maintenance Network:** For service parts, we have 8 warehouses in the US, with additional warehouses in Canada and Mexico

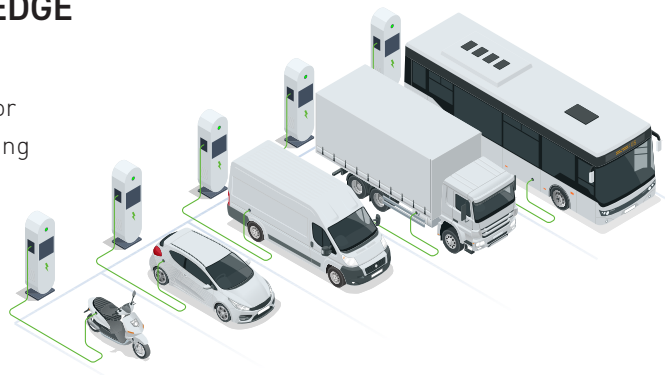

MARKET PROFILE:

EV CHARGING STATIONS

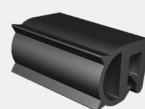

LEVERAGING OUR ENGINEERING KNOWLEDGE

Allegis has collaborated with thousands of customers over the past 50+ years to identify and apply the best products for their applications. We understand how to combine interacting components to find the ideal balance between function, aesthetics, and cost. When the solution required is beyond our available hardware, we will custom design a system to meet a manufacturer's exact needs.

LATCHING

With a wide range of latching options, we are able to provide the correct latch for your needs. Multipoint solutions, Concealed solutions, Electromechanic latches, Compression latches.

SEALING PROFILES, GASKETS AND EDGE TRIM

Select the best option based on your design. With the ability to design custom gaskets or cut to length options that are cold bonded, we can provide the perfect solution for easy installation and proper sealing of your door.

GAS SPRINGS

Hold open a door or panel to provide easier access for maintenance against wind or unbalanced conditions or create self-opening doors to eliminate false latching.

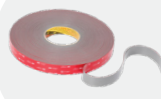

HINGES

Easily conceal hinges so no hardware is visible on the outside of your unit. External hinges, Friction, Removable, or Adjustable hinges.

3M - VHB OR ADHESIVE

Easily install panels without the need for fasteners. Keep clean lines and speed up your assembly process without losing strength.

CREATING A BETTER END PRODUCT

Ready to begin your next project? For answers about multi-point latching systems and other access hardware, contact Allegis. Let our application engineers help your organization deliver solutions that will drive more value and a better product experience for the end-user.
